PROFESSIONAL SUMMARY

Technical Lead and Senior Full Stack & Generative AI Engineer with 4+ years of experience engineering scalable backend architecture, cloud infrastructure, and AI-powered automation platforms. Proficient in Node.js, Python (FastAPI/Django), React.js, and modern LLM frameworks (LangChain, OpenAI API, RAG). Proven leadership managing a team of **5 software developers**, driving end-to-end software delivery, optimizing distributed systems (Redis, BullMQ), and building low-latency enterprise microservices.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python, SQL, HTML5, CSS3, PHP	**Frontend:**	React.js, Next.js, Tailwind CSS, Bootstrap, jQuery
Backend:	Node.js, Express.js, FastAPI, Flask, Django, Laravel	**Gen AI & LLM:**	OpenAI APIs, RAG, LangChain, LangSmith, ElevenLabs, Twilio
Databases & Vector:	MongoDB, MySQL, PostgreSQL, Supabase, Firebase, Redis	**Cloud & DevOps:**	AWS (EC2, Lambda, ECS, S3, RDS), Docker, CI/CD, Git

PROFESSIONAL EXPERIENCE

Generative AI Solutions Engineer | **Mavriq Webtech** — **Jan 2025 – Present | Chandigarh, India**

1. **Mentored & Led 5 Developers:** Directed code reviews, technical estimations, sprint execution, and technical interviews for an engineering team of 5 developers to streamline feature delivery cycles.
2. **Engineered AI Voice Automation Platform:** Built an automated outbound voice calling service using Node.js, Python, OpenAI, Twilio, ElevenLabs, and LangChain to automate enterprise calling workflows.
3. **Architected Enterprise SaaS Solutions:** Developed full-stack SaaS applications (ERP, HRM, Store Management) utilizing React.js, Node.js, Express.js, Supabase, and MongoDB, delivering low-latency API endpoints.
4. **Built Payment & Marketplace Infrastructure:** Developed a subscription job marketplace featuring Stripe integrations, granular Role-Based Access Control (RBAC), and user engagement modules.

Full Stack Developer (MERN) | **Sofineer** — **Mar 2020 – Jan 2025 | Mohali, Punjab, India**

1. **Automated Government Portal Integrations:** Designed and implemented secure RESTful and SOAP API integrations connecting state portals to fully automate invoice processing.
2. **Crypto Exchange Engine Architecture:** Architected backend microservices for a cryptocurrency exchange platform, incorporating external market feeds, automated KYC pipelines, and real-time transaction engines.
3. **High-Concurrency Job Processing:** Integrated Redis caching and BullMQ message queuing to handle high-concurrency background processing and eliminate database bottlenecks.
4. **Database Optimization & Schema Design:** Managed database design, query optimization, and schema migrations across MySQL, PostgreSQL, and Firebase environments.

KEY PROJECTS

1. AI-Powered Enterprise SaaS Suite (ERP, HRM & Store Management) — Architected intelligent SaaS platforms featuring automated AI workflow triggers, real-time alert/notification pipelines, inventory forecasting, and automated HR management modules.

2. AI Automated Calling & Voice Agent Platform — Built an end-to-end voice automation service using Node.js, FastAPI, OpenAI, Twilio, and ElevenLabs with real-time speech processing and analytics.

3. Cryptocurrency Exchange & Production SaaS Apps — Built MERN web applications (mavriq.co.in, kittrow.com, prosmarketplace.com, tonguetingler.com) with crypto engine integrations and low-latency APIs.

EDUCATION & LANGUAGES

Master of Computer Applications (MCA) – AI & ML — **Expected Completion: 2027**
Chandigarh University
